DAYS 22 with meetings in this range

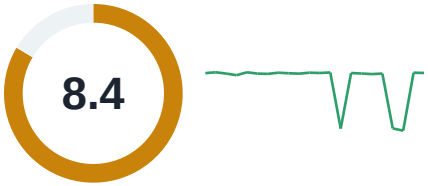

One summary per day is kept for 395 days, built at midnight Eastern; today's comes from the live readings.

MEETINGS

93 ATTENDED	**27** HOSTED
11.4 HOURS	**22** WEBINARS

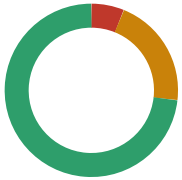

Zoom meetings and webinars on 22 days in this range.

EXPERIENCE SCORE

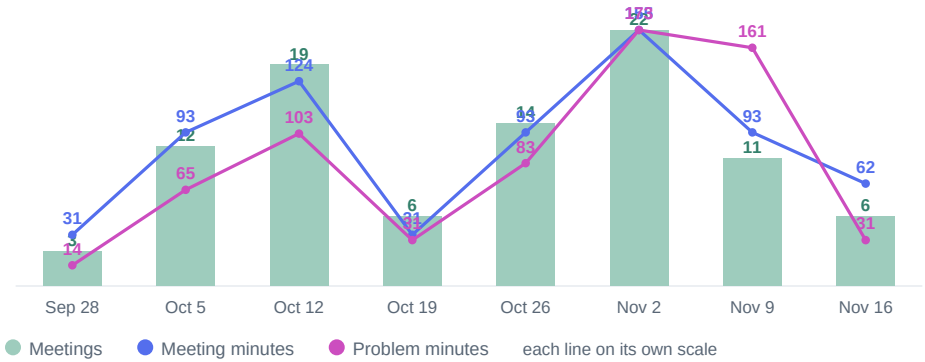

Out of 10: the share of meeting minutes with no problems, a minute with warnings counting half.

CONNECTION QUALITY

- **Bad** 6% — 151 min critical
- **Fair** 21% — 510 min with warnings
- **Good** 73% — 1,804 min

MEETING HISTORY by week

WHAT TO LOOK AT

- The computer struggled: Zoom or the system ran short of CPU in 8% of the minutes (system CPU up to 99%). Other programs open during calls, an old laptop or a pending Windows update are the usual causes.
- Packet loss or jitter in 8% of the minutes: the network between the person and Zoom (home internet, Wi-Fi, VPN or the office circuit).
- Zoom 5.17.10.34827, 7.2.1.48556 are older than the newest in use at the firm (7.2.2.88465): an update may help.

Made Tue, Nov 17, 2026, 2:20 PM ET. From Zoom's Dashboard readings of the person's meetings (one a minute per person), kept as one summary per day (since 2026-07-20). Quality: critical when Zoom's figures cross the critical lines, with warnings for lesser problems. Offices from the internet address Zoom's media left from.
